Professional Summary

Junior Web Engineer with hands-on experience building and maintaining live production SaaS systems. Specialized in Next.js, TypeScript, and .NET, developing scalable, performance-focused applications. Skilled in UI/UX design, database architecture, and creating user-centric, maintainable, production-ready solutions.

Focused on scalable dashboard systems, structured workflow architectures, and API-driven platforms, turning complex product requirements into maintainable and high-performance systems.

Professional Experience

Movith Technologies – Junior Web Engineer (Project-Based) | 2025

- Built and deployed corporate platform and website using Next.js, improving SEO and load times.
- Developed REST APIs and PostgreSQL backend for Movith Forms platform.
- Designed scalable, reusable frontend components with Tailwind CSS.
- Integrated AI-assisted chatbot to enhance user engagement.
- Maintained production-ready architecture for long-term project health.

Intern – IT Flash Team | Philip Morris International | 2023

- Supported enterprise IT operations in a multinational environment.
- Assisted in troubleshooting, monitoring, and maintaining internal systems.

Intern – C# Developer | CMA Consultancy & IT | 2023

- Contributed to backend development using C# and OOP principles.
- Assisted in database integration and development of small modules.

Technical Skills

Frontend:Next.js • React • TypeScript

Backend:ASP.NET Core • REST APIs

Database:PostgreSQL • Firebase

Tools & StylingGit • Tailwind CSS

Other:AI-assisted frontend features, workflow architecture, performance optimization

Education

B.Sc. in Information Technology

Eastern Mediterranean University | 2016–2023

Key Projects / Portfolio Highlights

Movith Forms – Production B2B SaaS

Enhanced live forms platform with scalable, customizable UI and backend integration.

- Fully responsive UI with advanced theme customization (colors, fonts, backgrounds).
- Backend API integration for theme persistence and cross-device synchronization.
- PostgreSQL database schema design for user and theme data.
- Integrated AI-assisted chatbot to enhance user engagement.
- Optimized frontend for performance, SEO, and UX.

Tech Stack: Next.js • TypeScript • .NET • PostgreSQL • Tailwind CSS

Live Demo: forms.movith.com

Movith.com – Corporate Platform / Website

Developed corporate platform with performance, responsiveness, and modularity focus.

- Built scalable, reusable frontend components.
- Improved SEO and page load performance.
- Integrated REST APIs for dynamic content.
- Maintained clean, maintainable code for future scalability.

Tech Stack: Next.js • React • TypeScript • Tailwind CSS

Live Site: movith.com

Personal Portfolio / Projects Showcase

Showcase of web applications, experiments, and design-driven projects.

- Developed personal website to showcase projects and skills.
- Implemented clean, performance-optimized UI with live demos and GitHub repositories.

Tech Stack: Next.js • TypeScript • Tailwind CSS

Portfolio: ayylmazslmn-website.vercel.app

Randevu Dehasi / B2B Appointment & Business Management SaaS

Developed a comprehensive, scalable appointment management platform tailored for clinics, salons, and gyms with a focus on performance and premium UI/UX.

- Engineered a multi-tenant architecture with role-based access control (Business Owner, Customer, System Admin).
- Built an interactive, real-time dashboard and calendar system with optimistic UI updates and WebSockets.
- Integrated a scalable multi-channel automated notification system utilizing WhatsApp Cloud API, Twilio (SMS), and Resend.
- Designed and optimized a robust PostgreSQL database architecture via Prisma ORM for seamless data synchronization.
- Delivered a high-contrast, fully responsive interface featuring sophisticated micro-animations and modular frontend components.
- Tech Stack: Next.js • TypeScript • Tailwind CSS • Prisma • PostgreSQL
